

Point-by-Point Response to Editorial Comments

VOUCH: Anytime-Valid Certificates for Machine Unlearning
via Paired-Canary Hypothesis-Betting

Manuscript ID: 4bbee415-ab8d-4923-a2b3-08f87b3b7b49, v2.0

Quang-Vinh Dang — British University Vietnam

20 July 2026

Dear Editors,

We thank the Editorial Office for the technical check on this resubmission. Our point-by-point response follows, with the comment quoted verbatim and our corresponding action described immediately below it.

Comment 1 (Technical Check, v2.0).

“Please add the following required information on the first page of your main manuscript file, right before the Abstract and keywords: A concise and informative title; the full name(s) of the author(s); the affiliation(s) and address(es) of the author(s) — including the individual city and country information; the e-mail address, telephone and fax numbers of the corresponding author.”

Response. This information was intended to be present in our previous resubmission, but due to a file-preparation error on our side the version actually uploaded did not carry the completed first page. We apologise for the oversight and have now verified, by directly inspecting the compiled PDF submitted with this resubmission, that the first page presents, immediately before the Abstract:

- the full title, *VOUCH: Anytime-Valid Certificates for Machine Unlearning via Paired-Canary Hypothesis-Betting*;
- the full name of the (sole) author, Quang-Vinh Dang;
- the affiliation and complete address, British University Vietnam, Ecopark, Hung Yen, Vietnam;
- the corresponding author’s e-mail address, `vinh.dq4@buv.edu.vn`, and telephone number, +84 768 496 935.

No fax number is provided, as the corresponding author does not have one; fax is not in active use in our institution or country. We trust the e-mail and telephone contact supplied satisfies the intent of this requirement.

The Contribution Information Sheet requested by the Editor-in-Chief in the previous round remains included as part of the cover letter, immediately following its closing, and is unchanged from that resubmission.

We believe this revision fully addresses the point raised, and we thank the Editorial Office for their patience.

Sincerely,
Quang-Vinh Dang
British University Vietnam
